

Talha Saleem

Senior Software Engineer

Full-stack developer with 4+ years of experience building real-world SaaS products and enterprise platforms. I work across the entire stack, from pixel-perfect React UIs to scalable Node.js backends and cloud deployments. I've taken products from zero to launch and contributed to systems that run in production.

WORK EXPERIENCE

Senior Software Engineer

Hashlogics

Feb 2024 - Present | Lahore

Achievements

- Led the development of TankAware as the main engineer, a petroleum inspection and tank management platform built from scratch for Canadian clients (Next.js, Node.js, Express.js, PostgreSQL, AWS); improved inspection accuracy and reduced operational overhead
- Built ZyloBase end-to-end, a SaaS CRM for field service businesses with trademarked workflows, Stripe Connect billing, Twilio messaging, and QuickBooks sync
- Used Claude Code and AI-assisted workflows throughout development to move faster, catch issues earlier, and keep code quality high across projects
- Implemented secure Supabase backends with RLS and RPCs, integrated payment gateways, and handled production deployments on Vercel, Netlify, and AWS EC2
- Worked closely with designers and stakeholders to turn Figma mockups into responsive, production-ready interfaces

Software Engineer

Contegris Technology Simplified

Apr 2021 - Oct 2023 | Lahore

Achievements

- Worked as a core contributor on Intellicon, Pakistan's enterprise AI-powered contact center platform, used by Daraz, Zameen.com, and major banks
- Built and maintained product modules including, IntelliSales CRM, IntelliDesk, Campaigns, Real-Time Dashboards
- Designed real-time microservices using RabbitMQ and WebSockets for scalable backend communication
- Built RESTful APIs with MySQL and MongoDB to support the platform's core backend

EDUCATION

MCS (Master of Computer Science)

Virtual University of Pakistan

Jan 2019 - Jan 2021 | 3.34 CGPA

SKILLS

TypeScript React.js Next.js Node.js
Express.js PostgreSQL MongoDB
