TALHA SALEEM

Senior Software Engineer | React.js · Node.js · Express.js · TypeScript · Python

Lahore, Pakistan | +92 332 4603199 | saleemtalha294@gmail.com | linkedin.com/in/talha-saleem-680b381b2 | github.com/talhasaleem294

PROFESSIONAL SUMMARY

Senior Software Engineer with **5+ years** of experience architecting and shipping production-grade SaaS platforms and enterprise systems end to end. Skilled across **React.js, Next.js, Node.js, TypeScript, and PostgreSQL**, with a track record of owning full-stack features, integrating third-party APIs, and leading product development across field services, petroleum operations, and enterprise contact center platforms. Regular user of **AI-assisted development tools (Claude Code)** to write clean, maintainable code and ship faster.

TECHNICAL SKILLS

LANGUAGES JavaScript, TypeScript, Python

FRONTEND React.js, Next.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3

BACKEND Node.js, Express.js, NestJS, FastAPI, REST APIs, WebSockets, RabbitMQ, Microservices Architecture

DATABASES PostgreSQL, MySQL, MongoDB, Supabase (RLS / RPCs), Prisma ORM

CLOUD & DEVOPS AWS EC2, Vercel, Netlify, Git, GitLab, CI/CD, Cloudflare, DNS Management

INTEGRATIONS Stripe Connect, PayPal, Twilio, QuickBooks, Shopify GraphQL API, Meta Graph API, Resend

AI / LLM Retrieval-Augmented Generation (RAG), LLM Function Calling / Tool Use, pgvector / Vector Search, Prompt Engineering, Groq API, Google Gemini API

PRACTICES Agile / Scrum, System Design, Multi-Tenant Architecture, API Design, Figma-to-Code

WORK EXPERIENCE

WhyCrew | Senior Software Engineer *Jul 2026 – Present*

Sentinel Edge | Threat Intelligence & Firewall Integration Platform

Python, FastAPI, React, TypeScript, PostgreSQL, ClickHouse, Kafka, Docker

- Built a **threat-intelligence platform** that collects security data from on-site sensors and streams it to a cloud dashboard over an encrypted connection
- Integrated with commercial firewalls (**FortiGate, Palo Alto**) to push threat feeds and pull back detection logs in real time
- Designed the backend data layer using **PostgreSQL, ClickHouse, and Kafka** to handle high-volume event data and real-time streaming
- Built the multi-tenant console with **role-based access control** and real-time detection views using React and TypeScript
- Wrote **378+ automated tests** and deployed the platform to a live client environment

Hashlogics | Senior Software Engineer *Feb 2024 – Jun 2026*

TankAware | Petroleum Inspection Platform

Next.js, Node.js, Express.js, PostgreSQL, AWS

- **Architected and led the platform build from scratch** for Canada-based petroleum site operators, from database schema design through cloud deployment on AWS EC2
- Developed modules including **site/tank management, inspection automation, maintenance alerts and notifications** for equipment issues, and work order tracking
- Designed role-based access control for site managers, contractors, and stakeholders, compliance-focused exportable reporting, and a subscription billing module

- Improved inspection accuracy, streamlined operations, reduced manual errors, and significantly shortened maintenance response times

ZyloBase | SaaS CRM for Field Service Businesses

Next.js, React.js, Node.js, PostgreSQL, Supabase, Stripe Connect, Twilio, Mapbox, TypeScript, Tailwind CSS

- Delivered a multi-module CRM for pressure washing, pest control, lawn care, and solar sales businesses at high velocity, including **12 trademarked workflow features** (route conversion, tap-on-map quoting via Mapbox, field-to-supervisor sync) powered by Stripe Connect, Twilio, and Mapbox integrations
- Engineered **Supabase backends with Row-Level Security (RLS) and RPCs** for multi-tenant data isolation across customer workspaces
- Integrated **Stripe Connect** billing, **Twilio** SMS automation, and QuickBooks sync across three pricing tiers (**$59–$599/mo**); publicly launched to paying customers in May 2026
- Leveraged **Claude Code and AI-assisted workflows** throughout development to increase velocity while maintaining code quality

Contegris Technology Simplified | Software Engineer *Apr 2021 – Oct 2023*

Intellicon | Enterprise Omnichannel Contact Center Platform (CCaaS)

React.js, Node.js, Express.js, MySQL, MongoDB, WebSockets, RabbitMQ, Microservices

- Contributed to **IntelliDesk and IntelliSales CRM** modules for Pakistan's leading enterprise contact center suite, trusted by Daraz, Zameen.com, major banks, and telecom companies
- Enhanced the **Unified Agent Panel and Real-Time Dashboards**, giving agents and supervisors live visibility into queue metrics and performance reporting
- Developed **SMS and WhatsApp campaign management** features, enabling bulk messaging workflows for enterprise clients
- Used **RabbitMQ and WebSockets** for real-time agent presence and dashboard updates, and built RESTful APIs backed by MySQL and MongoDB to sync CRM and reporting data, while maintaining version control and release workflows via GitLab in an Agile/Scrum environment

ADDITIONAL PROJECTS

StoreIQ | Shopify Profit & Ads Intelligence Platform

React 19, TypeScript, Supabase, PostgreSQL, pgvector, Shopify GraphQL API, Meta Graph API, Vercel

Conceived, designed, and built a SaaS profit intelligence platform enabling Shopify store owners to track real net profit after ad spend, refunds, COD fees, influencer costs, and overheads. Established workspace-level RBAC with **Supabase RLS policies** and shipped modules including Profit Dashboard, Meta Ads Intelligence, and RTO Intelligence. Built an **LLM-powered assistant** and a public **RAG** support chatbot (Gemini embeddings, pgvector search); deployed to **Vercel** with a custom domain.

EDUCATION

Master of Computer Science (MCS) **2019 – 2021**

Virtual University of Pakistan | CGPA: 3.34 / 4.0
